I worked with Jerry at HVIF the Palms location. He was a wonderful person, coworker, and friend. He scanned my little girl while she was still in my stomach, and one day he had a worried look on his face. He told me she was breech, but I saw he kept scanning around her head area. I knew enough about ultrasound to know there was a vessel he was looking at. He mildly and yet very professionally suggested I might want to ask my doctor to do an ultrasound, too. I found out my little girl had the cord wrapped around her neck twice. My doctor immediately scheduled a c-section, but I went into labor before the c-section appt. I had an emergency c-section and was found to have had an abruption. I delivered my daughter healthy and safe. Had I not have known she was in danger, I may not have gone so soon to the hospital the day I started labor. Things could have gone very wrong. Thank you so so so very much Jerry. I feel Jerry was very instrumental in saving my daughter's life.

I have known and worked with Jerry at two separate work places. I first met him while I worked at St. Pete General in PCU as the charge nurse and more recently at HAVI. He was good friends and fishing buddies with my monitor tech Bob Johnstone. I can still recall their very animated conversations that frequently got him asked to remove himself from the area. Now Bob and Jerry are fishing together forever...two great guys...both gone way too soon. My condolences to all the many family and friends he has left behind.
